C#

Java

Personal Project

Forum Web Application | Jan 2025 - Present

Frontend Developer

- Designed and developed a discussion forum interface using React and JavaScript.
- Implemented features such as user authentication, post creation, comments, and search functionality.
- Applied state management and component-based architecture for better scalability and maintainability.
- Collaborated in a team of 5 members using Git and GitHub, ensuring smooth version control and code reviews.

E-Learning Website | Sep 2024 - Jan 2025

Frontend Developer

- Developed a responsive online course platform using React, HTML, CSS, and REST APIs.
- Built reusable UI components and implemented responsive layouts compatible with 95% of modern devices.
- Integrated backend APIs for authentication, course listing, and user management.
- Improved page load performance by approximately 20% through asset optimization and code refactoring.
- Maintained an on-time task completion rate of around 90% during development.

Sales Management System (Academic Project) | Oct 2023 - Jan 2024

Fullstack Developer

- Developed a web-based sales management system with product listing, cart, and order tracking features.

Interests

Reading, Running, Traveling

- Built responsive frontend interfaces and connected them with backend APIs.
- Optimized database queries and improved overall application performance by approximately 15%.
- Participated in full SDLC including requirement analysis, development, testing, and deployment.

Activities

My First Website Project | Mar 2023 - May 2023

Co-Developer

- Developed a personal website using WordPress in a team of two members.
- Designed and customized themes, managed plugins, and optimized page structure.
- Improved basic understanding of hosting, domain configuration, and CMS workflow.
- Collaborated using task division and version tracking to ensure timely completion.

IT Got Talent Competition | Sep 2025 - Nov 2025

Semi-Finalist

- Participated in IT Got Talent competition with an E-Learning platform project.
- Designed and presented a web-based learning solution focused on user experience and accessibility.
- Selected as a Semi-Finalist among multiple student teams.
- Demonstrated strong problem-solving, presentation, and product development skills.

Gemini Certified Educator | Issued Oct 2025 - Valid through Oct 2028

• Certified by Google for Education for demonstrating knowledge and competencies in applying AI tools in education.
• Applied Gemini AI tools to enhance productivity and educational project development.
